

Dear AP Calculus AB Student,

You are currently registered for Advanced Placement Calculus AB next fall and I look forward to working with you. Students have been successful in the past because of their dedication and effort. To aid in your success, an online assignment, reviewing key PreCalculus ideas has been created containing several exercises of prerequisite skills. During the summer break, please work all of the problems. At some point between now and the start of school this fall, you are expected to complete all exercises on your DeltaMath account. These problems are due the first day of school. The content is pre-requisite knowledge for AP Calculus AB, and may be tested on the first exam. It is quite possible that some of the exercises in the exercises will have 'escaped' you. There are many resources available to help in reviewing such forgotten concepts – Khan Academy, Youtube, review software and books available, as well as emailing me with any questions you may have! Thank you in advance for your time this summer to make next year easier and more productive for all involved. We should have a great year, and I am excited to begin working with all of you. Have a great summer!

Go to <https://www.deltamath.com/> and create an account. Then put the teacher code **962947** to link to our classroom. Please let me know if you have any trouble!

Sincerely,

Alicia Womick
